PLEASE NOTE

DOCUMENTATION CHANGES FOR THE HARDWARE BOOKLET AND HANDBOOK

Hardware Booklets

1. The minimum RAM requirements for the Back to Basics Accounting System are as follows:

RAM	COMPUTER
48K	Atari 800
	Apple II+
64K	Apple IIc
	Apple IIe
	IBM PC
	Atari 800XL
	Atari 1200XL
	Commodore 64
128K	IBM PCjr

2. Password Clarification: During the Start Up Procedures, it is recommended that the Password be entered in all upper case letters, as some computers only recognize upper case letters.

3. IBM PC and PCjr Versions:
   - To edit fields, use the Tab function to move right and the Backspace function to move left.
   - Under Hardware Information under the Configuration Menu, the first option is **Printer Selection.**

Handbook

1. Overview of Accounting
   - Page 9, next to last paragraph, second line should read:
     increased a liability
   - Page 51 and 59—Back to Basics calculates straight line depreciation through the Automatic Journal Entries option.

2. General Ledger Sample Company
